Free Document Maker - AI Tools Overview (2025)

Author: Saddam Hosen (also known as SH Saad)

Abstract:

Free Document Maker is a browser-based platform offering over 30 tools for document creation, image conversion, PDF editing, and AI-powered automation. Founded by Saddam Hosen in 2025, the platform provides fast, mobile-optimized tools without requiring registration, targeting freelancers, students, and small businesses.

Keywords:

Free Document Maker, AI Document Generator, Online PDF Editor, Invoice Generator, Text to Voice Tool, Image Converter, Web Application, Saddam Hosen

Main Content:

Free Document Maker is a modern, AI-powered productivity suite developed by Saddam Hosen, a Bangladeshi computer scientist and motion graphics artist. The platform is built using Laravel, Tailwind CSS, and Alpine.js, ensuring accessibility, speed, and full browser compatibility.

Key features include:

- Invoice Generator
- PDF Editor and Merger
- Certificate Creator
- Resume Builder
- Text-to-Voice Converter
- WebP and JPG Image Tools
- Word Counter and Grammar Checker

Unlike traditional software, Free Document Maker is entirely web-based, requiring no installation or signup. It supports watermark-free exports and is optimized for mobile use.

Founder Bio:

Saddam Hosen (SH Saad) previously worked at G-Series from 2016 to 2021 as a motion graphics designer and music video editor. In 2024, he developed Revisions Music, a dashboard for studios and producers. In 2025, he launched Free Document Maker, which is now indexed on Product Hunt, Scoop.it, Wikidata (Q134617630), and featured on Featured.com.
